Conjectured formulas of the OEIS by Simon Plouffe as of Sept 6. 2014
There are 45691 unique sequence and more than 148403 expressions.
Score = log(# of terms)*(length of sequence in charaters)/(length of the formula in characters).

If the score is high the reliability of the formula is good.
A score near 1 is not good, a score of 20+ is excellent.

Some formulas are in double for many reasons, the sign or the factorization of the expression makes a change in length. The intention of the author is to keep the list as clean as possible, with time it will be done...

These formulas are suggested, most of them are the true ones, in some cases the formula found automatically are better than the original reference.

Some formulas are false positives, in some rare cases, even false the formula found is sometimes as interesting as the original.

This is version 2014 of http://arxiv.org/abs/0911.4975 published in 1992 containing 1031 formulas.
